**DEVICE FOR STABILIZING THE ENGINE INLET FLOW**  
**IN STATIC TESTS OF ENGINES**

**REASONS FOR ALLOWANCE**

The following is an Examiner's statement of reasons for allowance:

Claim 1 has been found to be allowable over the prior art because the prior art fails to teach or suggest an apparatus for the stabilization of the engine inlet flow in engine static tests, *consisting of* an air-permeable element (4) which, in an end position, is arranged situated near an engine housing (2) and partially enclosing the latter, characterized in that the air-permeable element (4) is formed with a first air-permeable embodied planar element part (6), which is arranged under the engine housing (2) and parallel to a planar ground (7) in the vertical spacing distance (a), on the surfacial rim side on the longitudinal edges as claimed, and further air-permeable embodied planar element parts (9 to 12), that are embodied tiltable or foldable out of an existing horizontal orientation to the engine housing (2),

in addition to the remaining limitations as claimed.

All of the remaining claims have been found to be allowable over the prior art due to the claims' dependency on claim 1.

Any comments considered necessary by the Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
